

Planet Beauty®

We are proud to present the world's most advanced hair re-growth technology from DS Laboratories. These exciting products are the pinnacle in modern technology and are unsurpassed in their ability to grow normally thick and healthy hair – even for people who previously did not respond to other treatments.

Revita

The most efficient hair-growth stimulating shampoo available in the market, Revita is the final result of DS Laboratories' efforts in cutting-edge research. Revita is a powerful and unique combination of active ingredients specially designed to maintain scalp vitality and act on follicle dysfunctions to achieve best results in short periods of time. The final result is a very high-quality shampoo product with absolutely no equivalent competitor in the market. Revita combines costly first-line compounds at high concentrations, like Caffeine, Pyrus Malus (Apple) Seed Extract, and Spin Traps (SOD Mimic).

Spectral.RS

Spectral.RS is a breakthrough leave-in treatment that addresses multiple causes that lead to hair loss such as perifollicular fibrosis and internal factors such as stress, hormonal disturbances, and lack of vitamins and mineral salts. Perifollicular fibrosis is a condition that accompanies all hair loss whereby the collagen around the hair root becomes rigid and tightens, pushing the root to the surface and causing premature hair loss. Spectral.RS is based on several powerful compounds such as Adenosine and Procyanidin B-2 and C-1, which in clinical trials closely resemble the effectiveness of minoxidil but without any side effects.
